

1 (vi) biology  
**Multiple Choice Questions (MCQs)**  
(for 3<sup>rd</sup> Term)  
**CLASS: VI**  
**SUBJECT: BIOLOGY**

=====

**Chapter – 7**

- Question 1) In which year Alexander Fleming discovered an enzyme  
(a) 1984 (b) 1923 (c) 1912 (d) 1907
- Question 2) Any condition that interferes with the normal body functions due to some reasons is called  
(a) Hereditary (b) disease (c) Health (d) none
- Question 3) A state of complete physical, mental and social well-being and not merely the absence of disease is defined as  
(a) disease (b) Health (c) consumption (d) none
- Question 4) Diseases can be categorised into \_\_\_\_\_ categories  
(a) 2 (b) 8 (c) 6 (d) none
- Question 5) Diseases which are present in the body from the birth are called \_\_\_\_\_ diseases.  
(a) Haemophilia (b) Leprosy (c) congenital (d) none
- Question 6) The main cause congenital diseases is due to a \_\_\_\_\_  
(a) genetic abnormality (b) Hereditary (c) diabetic (d) none
- Question 7) \_\_\_\_\_ is a group of inherited blood disorders in which the loses its ability to clot.  
(a) Thalasaemia (b) Haemophilia (c) Colour blindness (d) none
- Question 8) Acquired diseases develop – after  
(a) after birth (b) before birth (c) both (a) and (b) (d) none
- Question 9) Diseases that can be passed from an infected person to a healthy person in direct or indirect manner are called  
(a) Droplet diseases (b) non communicable disease (c) communicable diseases (d) none
- Question 10) Virus belongs to which disease  
(a) common cold (b) tetanus (c) Typhoid (d) cholera
- Question 11) Protozoa belongs to which disease  
(a) leprosy (b) botulism (c) malaria (d) ascariases
- Question 12) Worms belongs to which disease  
(a) Amoebiasis (b) swine flue (c) Elephantiasis (d) diptheria
- Question 13) Some diseases are not spread from person to person or by microorganisms or directly or indirectly are called  
(a) communicable (b) hereditary (c) non-communicable (d) none
- Question 14) Communicable diseases can spread through an infected person or through various mode such as air, water, food, and organisms known as  
(a) vectors (b) Tuberculosis (c) both (a) and (b) (d) none
- Question 15) Bacteria are found everywhere in the  
(a) air (b) water, food (c) soil (d) all
- Question 16) Cholera is caused by bacterium  
(a) clostridium tetani (b) Salmonella Typhi (c) Microbacterium leproe (d) vibrio cholerae
- Question 17) Protozoa are \_\_\_\_\_ organisms  
(a) multicellular (b) doubled called (c) single celled (d) none
- Question 18) Amoebiasis is caused by  
(a) Salmonella Typhi (b) Vibrio cholerae (c) Entamoeba histolyticad (d) none
- Question 19) Typhoid is caused by a rod shaped bacteria called  
(a) Micobacteria (b) wichu (c) Salmonello Typhi (d) none
- Question 20) The period between the exposure to an infection and the appearance of the first symptom are called  
(a) Incubation (b) malnutrition (c) both (a) and (b) (d) none
- Question 21) When the supply of all nutrients is done in right amount and ration according to the need of the body, we call it a  
(a) balance diet (b) Protein (c) carbohydrates (d) none
- Question 22) Marasmus results due to the deficiency of  
(a) Proteins and carbohydrate (b) Proteins and fats (c) Protein starch (d) none
- Question 23) Full form of HIV is  
(a) Human Immunodeficiency virus (b) Human immunity virus  
(c) Health Immunodeficiency virus (d) none
- Question 24) Conjunctivitis, a viral infection of  
(a) nose (b) ear (c) eyes (d) throat
- Question 25) Ascariasis is a type of infection which occurs in the  
(a) Lungs (b) small intestine (c) Large intestine (d) liver
- Question 26) Taeniasis is another type of intestinal infection caused by  
(a) Ascaris (b) Leech (c) Tapeworm (d) Planaria

**Chapter – 8**

- Question 1) Animals living in water  
(a) Aquatic organism (b) Arboreal animal (c) Amphibians (d) Aerial animals
- Question 2) Animals that live both on land and in water  
(a) Aerial animals (b) Terrestrial organism (c) Amphibians (d) none
- Question 3) Animals that live in trees  
(a) Hydrophytes (b) aquatic animal (c) Arboreal animals (d) none
- Question 4) Animals that spend most of their time in air  
(a) Aerial animals (b) Epiphytes (c) Hydrophytes (d) none

## 2 (vi) biology

- Question 5) Air plants that grow upon other plant for physical support  
(a) Aerial animals (b) Hydrophytes (c) Epiphytes (d) none
- Question 6) Plants living in freshwater are  
(a) Hydrophytes (b) Epiphyte (c) all (d) none
- Question 7) Animals living on land are called  
(a) Hydrophytes (b) Epiphytes (c) Terrestrial organism (d) none
- Question 8) A \_\_\_\_\_ is a place where plants and animals live naturally  
(a) habitat (b) home (c) epiphytes (d) none
- Question 9) Plants that live in hot and dry climate of deserts are known as  
(a) Hydrophytes (b) xerophytes (c) epiphytes (d) none
- Question 10) Example of xerophytes are  
(a) cactus (b) Babul (c) both (a) and (b) (d) none
- Question 11) The hump of camel stores \_\_\_\_\_ in it as a food reserve.  
(a) Starch (b) fats (c) protein (d) none
- Question 12) At mountains, there is \_\_\_\_\_ oxygen content and people feel breathless and nauseous.  
(a) high (b) low (c) Average (d) none
- Question 13) Certain changes in an organism occur over a short period of time. They help to adjust to the changes in its surroundings. This is called \_\_\_\_\_  
(a) acclimatization (b) Adaptation (c) Puberty (d) None
- Question 14) Some plants float in water as they are  
(a) heavy and spongy (b) light and spongy (c) heavy and thorny (d) none
- Question 15) Some plants are submerged in \_\_\_\_\_  
(a) water (b) soil (c) both (a) and (b) (d) none
- Question 16) Fish have \_\_\_\_\_ body.  
(a) Sticky (b) moist (c) streamlined (d) none
- Question 17) They have \_\_\_\_\_ on their bodies which are slippery  
(a) wings (b) scales (c) both (a) and (b) (d) none
- Question 18) opuntia is example of  
(a) mesophyte (b) Hydrophyte (c) xerophyte (d) none
- Question 19) The flat fins and \_\_\_\_\_ help the fish to change their direction and help them in maintaining balance in water.  
(a) wings (b) tails (c) both (a) and (b) (d) none
- Question 20) Water lily is example of  
(a) fixed plants (b) floating plants (c) both (a) and (b) (d) none
- Question 21) Epiphytes are \_\_\_\_\_ plants that grow upon other plant for physical support  
(a) water (b) air (c) land (d) none
- Question 22) Mountain goat is covered with a thick white fur that keeps its body warm in \_\_\_\_\_  
(a) warm weather (b) cold weather (c) neither warm or cold (d) both
- Question 23) The best known epiphytes  
(a) Pine (b) fir (c) orchids (d) none
- Question 24) Body part of camel that store \_\_\_\_\_  
(a) water (b) food (c) both (a) and (b) (d) none
- Question 25) Animals found in the mountains are  
(a) snow leopards (b) snail (c) Elephants (d) none
