

1 vii Biology  
**Multiple Choice Questions (MCQs)**  
(for 3<sup>rd</sup> Term)  
**CLASS: VII**  
**SUBJECT: BIOLOGY**

=====

**Chapter – 6**

- Question 1) The brain is protected on the out side by strong \_\_\_\_\_ bones.  
(a) Nerve sell (b) Neurons (c) skull (d) none
- Question 2) The ability of brain for remembering all facts is called.  
(a) Memory (b) Body action (c) cyton (d) none of these
- Question 3) Our brain is divided into  
(a) one (b) three (c) four (d) none
- Question 4) \_\_\_\_\_ is located at the top of the brainstem  
(a) cerebrum (b) cerebellum (c) oblongata (d) none
- Question 5) \_\_\_\_\_ controls the movement of our muscles.  
(a) The medulla (b) cerebellum (c) liver (d) cerebrum
- Question 6) What is protected by vertebrae of spine  
(a) spinal cord (b) cell (c) ribs (d) none
- Question 7) It is small egg shaped part under the cerebrum at the back of the head.  
(a) Brain (b) The cerebellum (c) The cerebrum (d) none
- Question 8) It is shaped like a stem  
(a) Medulla oblongata (b) cerebellum (c) cerebrum (d) none
- Question 9) In human right side of the brain controls  
(a) Right side (b) left side (c) both side (d) none
- Question 10) Left side of brain controls which side of a human body  
(a) Left side (b) Right side (c) both (d) none
- Question 11) What controls reflex actions  
(a) brain (b) cell (c) spinal cord (d) none
- Question 12) Which part of the brain works  
(a) Medulla oblongata (b) cerebellum (c) cerebrum (d) none
- Question 13) It controls involuntary actions such as the breathing and heart beat?  
(a) Right cerebrum (b) cerebellum (c) Medulla (d) none
- Question 14) What emerges from the base of the brain and joins spinal cord  
(a) The medulla oblongata (b) cerebrum (c) Grooves (d) none
- Question 15) The short fibre that areas from cell body  
(a) cyton (b) dendrite (c) neuron (d) none
- Question 16) A long specialised process arising from the other side of cyton is  
(a) cyton (b) dendrite (c) Axon (d) none
- Question 17) Axon is surrounded by a sheath called  
(a) Neuron (b) Mylin sheath (c) cell (d) none
- Question 18) Dendron are divided from  
(a) cyton (b) dendrite (c) axon (d) dendrite
- Question 19) Cyton contain nucleus and  
(a) Axon (b) Dendrite (c) Cytoplasm (d) none
- Question 20) \_\_\_\_\_ banels from our brain to spinal cord to all part of body  
(a) Message (b) Neurons (c) cell (d) none
- Question 21) There are \_\_\_\_\_ pair of cranial nerves in our body.  
(a) 10 (b) 12 (c) 13
- Question 22) If your hand accidentally touch a hot glass, the command to remove the hand from the glass is given by  
(a) cerebrum (b) cerebellum (c) medulla oblongata (d) none
- Question 23) In the human brain thinking done by  
(a) cerebrum (b) cerebellum (c) spinal cord (d) none
- Question 24) Which of the following nerves carry information to the brain  
(a) motor nerve (b) sensory nerve (c) cranial nerve (d) none
- Question 25) The nerve arises from the spinal cord are  
(a) spinal nerves (b) cranial nerves (c) mixed nerve (d) none

**Chapter – 7**

- Question 1) Whom should we consult to know about allergy?  
(a) Allergens (b) Allergist (c) Physician (d) none
- Question 2) Which kind of allergy is caused due to aspergillus?  
(a) Dust mite (b) Poller (c) dust (d) none
- Question 3) When do seasonal allergy occur?  
(a) Throughout the year (b) every season (c) Perenial year (d) none
- Question 4) How can pollen grain enter in the body  
(a) wheezing (b) Air (c) Nausea (d) None
- Question 5) Which symptom occurs commonly due to pollen allergy?  
(a) wheezing (b) stomach ache (c) skin rashes (d) none
- Question 6) Allergies that often occur on set of different seasons.  
(a) seasonal allergies (b) Perennial allergies (c) Histamine (d) none
- Question 7) A chemical allergen comes in contact with  
(a) Allergen (b) Histamine (c) mineral (d) none

2 vii Biology

- Question 8) Allergies that may occur any time of the year or remain throughout the year  
(a) seasonal allergies (b) perennial allergies (c) Histamine (d) none
- Question 9) Allergies that often occur on onset different seasons  
(a) Histamine (b) Perennial (c) Seasonal allergies (d) none
- Question 10) Eat balance diet to build you \_\_\_\_\_ system stronger  
(a) Vitamin (b) Mineral (c) Immunity (d) none
- Question 11) Some people are allergic to sunlight it is also known as  
(a) Sun rashes (b) Photosensitivity (c) Nausea (d) none
- Question 12) Pollen grain can enter the body mostly through  
(a) water (b) mineral (c) air (d) none
- Question 13) When do perennial occur?  
(a) Summer (b) whole year (c) spring (d) winter
- Question 14) Dust allergy includes  
(a) sneezing (b) stomach ache (c) vomiting (d) none
- Question 15) Food allergies includes  
(a) stuffy nose (b) stomach ache (c) coughing (d) none
- Question 16) We should drink \_\_\_\_\_ water to get relief from itchy throat  
(a) cold (b) hot (c) warm (d) none
- Question 17) Aspergillus conidiophores is a type of  
(a) vitamin (b) fungi (c) mineral (d) none
- Question 18) The allergic reaction caused by nose is known as  
(a) Skin allergies (b) nasal allergy (c) oral allergy (d) none
- Question 19) The allergies caused in the skin is called  
(a) oral allergy (b) skin allergy (c) nasal allergy (d) none
- Question 20) Pollen allergies are also known as  
(a) Hay fever (b) Itcheness (c) Red eyes (d) none
- Question 21) Allergy can be categorised into how many type  
(a) two (b) three (c) five (d) none
- Question 22) Some plants produce spores such as fungus called.  
(a) Aspergillus conidiophores (b) coughing (c) sinus pain (d) none
- Question 23) Allergies due to dust are example of \_\_\_\_\_ allergy.  
(a) histamine (b) watery eyes (c) sneezing (d) none
- Question 24) Example of food allergen are  
(a) egg, overripe fruits sea food (b) unripe fruit (c) sea food (d) none
- Question 25) Moulds grow in \_\_\_\_\_ seasons at humid place  
(a) summer season (b) winter season (c) both (a) and (b) (d) none
- Question 26) These allergies happen to people who are sensitive to  
(a) water (b) sunlight (c) dust (d) none
